

MCM8-minichromosome maintenance complex component 8 Gene

Reference: PTXBC008830

Product type:	DNA	Storage Condition:	-20°C
Size/Quantity:	2 ug	Delivery Condition:	+4°C, Blue Ice
Synonyms	MCM8 minichromosome maintenance deficient 8; DNA replication licensing factor MCM8; DNA helicase MCM8; C20orf154; POF10; dJ967N21.5; REC homolog; minichromosome maintenance complex component 8; minichromosome maintenance 8 homologous recombination repair		

For research use only.

GENE DESCRIPTION	minichromosome maintenance complex component 8
GENE ID	84515
ORIGIN SPECIES	Human
ACCESSIONS	BC008830
VECTOR	pDONR223
NCBI SYMBOL	MCM8
LENGTH	ProteoGenix bp
SEQUENCE PRIMERS	Forward primer M13R (5'→3'): GTAAACGACGGCCAGT Reverse primer T7P (5'→3'): TAATACGACTCACTATAGG

ORF (Only for reference, product provided without STOP codon)
