

## Reference: PTXBC022792

|                |                                                                                                                                                                                                      |                     |                |
|----------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|----------------|
| Product type:  | DNA                                                                                                                                                                                                  | Storage Condition:  | -20°C          |
| Size/Quantity: | 2 ug                                                                                                                                                                                                 | Delivery Condition: | +4°C, Blue Ice |
| Synonyms       | serine/threonine-protein kinase VPRBP; protein VPRBP; VPRBP; HIV-1 Vpr-binding protein; Vpr (HIV-1) binding protein; Vpr-binding protein; vpr-interacting protein; DDB1 and CUL4 associated factor 1 |                     |                |

**For research use only.**

|                         |                                                                                                   |
|-------------------------|---------------------------------------------------------------------------------------------------|
| <b>GENE DESCRIPTION</b> | Vpr (HIV-1) binding protein                                                                       |
| <b>GENE ID</b>          | 9730                                                                                              |
| <b>ORIGIN SPECIES</b>   | Human                                                                                             |
| <b>ACCESSIONS</b>       | BC022792                                                                                          |
| <b>VECTOR</b>           | pDONR223                                                                                          |
| <b>NCBI SYMBOL</b>      | VPRBP                                                                                             |
| <b>LENGTH</b>           | ProteoGenix bp                                                                                    |
| <b>SEQUENCE PRIMERS</b> | Forward primer M13R (5'→3'): GTAAAACGACGGCCAGT<br>Reverse primer T7P (5'→3'): TAATACGACTCACTATAGG |
