

HBXIP-hepatitis B virus x interacting protein Gene

Reference: PTXBC062619

Product type:	DNA	Storage Condition:	-20°C
Size/Quantity:	2 ug	Delivery Condition:	+4°C, Blue Ice
Synonyms	HBXIP; XIP; regulator complex protein LAMTOR5; HBV X-interacting protein; HBx-interacting protein; hepatitis B virus x interacting protein; hepatitis B virus x-interacting protein (9.6kD); late endosomal/lysosomal adaptor and MAPK and MTOR activator 5; la		

For research use only.

GENE DESCRIPTION	hepatitis B virus x interacting protein
GENE ID	10542
ORIGIN SPECIES	Human
ACCESSIONS	BC062619
VECTOR	pDONR223
NCBI SYMBOL	HBXIP
LENGTH	ProteoGenix bp
SEQUENCE PRIMERS	Forward primer M13R (5'→3'): GTAAAACGACGGCCAGT Reverse primer T7P (5'→3'): TAATACGACTCACTATAGG

ORF (Only for reference, product provided without STOP codon)
