

## CLEC12A-C-type lectin domain family 12, member A Gene

Reference: PTXBC063424

|                |                                                                                                                                                                                                                           |                     |                |
|----------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|----------------|
| Product type:  | DNA                                                                                                                                                                                                                       | Storage Condition:  | -20°C          |
| Size/Quantity: | 2 ug                                                                                                                                                                                                                      | Delivery Condition: | +4°C, Blue Ice |
| Synonyms       | CD371; CLL-1; CLL1; DCAL-2; MICL; C-type lectin domain family 12 member A; C-type lectin protein CLL-1; C-type lectin-like molecule-1; dendritic cell-associated lectin 2; myeloid inhibitory C-type lectin-like receptor |                     |                |
