

## RBM16-RNA binding motif protein 16 Gene

Reference: PTXBC070071

|                |                                                                                                                                                                                                     |                     |                |
|----------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|----------------|
| Product type:  | DNA                                                                                                                                                                                                 | Storage Condition:  | -20°C          |
| Size/Quantity: | 2 ug                                                                                                                                                                                                | Delivery Condition: | +4°C, Blue Ice |
| Synonyms       | RBM16; protein SCAF8; CDC5L complex-associated protein 7; RNA-binding motif protein 16; SR-like CTD-associated factor 8; SR-related and CTD-associated factor 8; SR-related CTD associated factor 8 |                     |                |

**For research use only.**

|                         |                                                                                                  |
|-------------------------|--------------------------------------------------------------------------------------------------|
| <b>GENE DESCRIPTION</b> | RNA binding motif protein 16                                                                     |
| <b>GENE ID</b>          | 22828                                                                                            |
| <b>ORIGIN SPECIES</b>   | Human                                                                                            |
| <b>ACCESSIONS</b>       | BC070071                                                                                         |
| <b>VECTOR</b>           | pDONR223                                                                                         |
| <b>NCBI SYMBOL</b>      | RBM16                                                                                            |
| <b>LENGTH</b>           | ProteoGenix bp                                                                                   |
| <b>SEQUENCE PRIMERS</b> | Forward primer M13R (5'→3'): GTAAACGACGGCCAGT<br>Reverse primer T7P (5'→3'): TAATACGACTCACTATAGG |

### ORF (Only for reference, product provided without STOP codon)
