

LAPTM5-lysosomal multispinning membrane protein 5 Gene

Reference: PTXBC106896

Product type:	DNA	Storage Condition:	-20°C
Size/Quantity:	2 ug	Delivery Condition:	+4°C, Blue Ice
Synonyms	CLAST6; lysosomal-associated transmembrane protein 5; CD40-ligand-activated specific transcripts; human retinoic acid-inducible E3 protein; lysosomal associated multispinning membrane protein 5; lysosomal multispinning membrane protein 5; lysosomal-associ		

For research use only.

GENE DESCRIPTION	lysosomal multispinning membrane protein 5
GENE ID	7805
ORIGIN SPECIES	Human
ACCESSIONS	BC106896
VECTOR	pDONR223
NCBI SYMBOL	LAPTM5
LENGTH	ProteoGenix bp
SEQUENCE PRIMERS	Forward primer M13R (5'→3'): GTAAAACGACGGCCAGT Reverse primer T7P (5'→3'): TAATACGACTCACTATAGG

ORF (Only for reference, product provided without STOP codon)
