

## NFKBID-nuclear factor of kappa light polypeptide gene enhancer in B-cells inhibitor, delta Gene

Reference: PTXBC119646

|                |                                                                                                                                                                                                                                           |                     |                |
|----------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|----------------|
| Product type:  | DNA                                                                                                                                                                                                                                       | Storage Condition:  | -20°C          |
| Size/Quantity: | 2 ug                                                                                                                                                                                                                                      | Delivery Condition: | +4°C, Blue Ice |
| Synonyms       | IkappaBNS; TA-NFKBH; NF-kappa-B inhibitor delta; I-kappa-B-delta; T-cell activation NFKB-like protein; ikB-delta; ikappaBdelta; nuclear factor of kappa light polypeptide gene enhancer in B-cells inhibitor, delta; NFKB inhibitor delta |                     |                |

|-------------------------|---------------------------------------------------------------------------------------------------|
| <b>GENE DESCRIPTION</b> | nuclear factor of kappa light polypeptide gene enhancer in B-cells inhibitor, delta               |
| <b>GENE ID</b>          | 84807                                                                                             |
| <b>ORIGIN SPECIES</b>   | Human                                                                                             |
| <b>ACCESSIONS</b>       | BC119646                                                                                          |
| <b>VECTOR</b>           | pDONR223                                                                                          |
| <b>NCBI SYMBOL</b>      | NFKBID                                                                                            |
| <b>LENGTH</b>           | ProteoGenix bp                                                                                    |
| <b>SEQUENCE PRIMERS</b> | Forward primer M13R (5'→3'): GTAAAACGACGGCCAGT<br>Reverse primer T7P (5'→3'): TAATACGACTCACTATAGG |
