

GML-glycosylphosphatidylinositol anchored molecule like protein Gene

Reference: PTXBC126336

Product type:	DNA	Storage Condition:	-20°C
Size/Quantity:	2 ug	Delivery Condition:	+4°C, Blue Ice
Synonyms	LY6DL; glycosyl-phosphatidylinositol-anchored molecule-like protein; GPI anchored molecule like protein; Glycosylphosphatidylinositol-anchored molecule-like protein; glycosylphosphatidylinositol anchored molecule like protein; glycosylphosphatidylinositol		

For research use only.

GENE DESCRIPTION	glycosylphosphatidylinositol anchored molecule like protein
GENE ID	2765
ORIGIN SPECIES	Human
ACCESSIONS	BC126336
VECTOR	pDONR223
NCBI SYMBOL	GML
LENGTH	ProteoGenix bp
SEQUENCE PRIMERS	Forward primer M13R (5'→3'): GTAAAACGACGGCCAGT Reverse primer T7P (5'→3'): TAATACGACTCACTATAGG

ORF (Only for reference, product provided without STOP codon)
