

## A1CF-APOBEC1 complementation factor Gene

Reference: PTXBC130519

|                |                                                                                                                                                                         |                     |                |
|----------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|----------------|
| Product type:  | DNA                                                                                                                                                                     | Storage Condition:  | -20°C          |
| Size/Quantity: | 2 ug                                                                                                                                                                    | Delivery Condition: | +4°C, Blue Ice |
| Synonyms       | ACF; ACF64; ACF65; APOBEC1CF; ASP; APOBEC1 complementation factor; APOBEC-1 stimulating protein; apo-B RNA editing protein; apobec-1 complementation factor (ACF) (ASP) |                     |                |

**For research use only.**

|                         |                                                                                                  |
|-------------------------|--------------------------------------------------------------------------------------------------|
| <b>GENE DESCRIPTION</b> | APOBEC1 complementation factor                                                                   |
| <b>GENE ID</b>          | 29974                                                                                            |
| <b>ORIGIN SPECIES</b>   | Human                                                                                            |
| <b>ACCESSIONS</b>       | BC130519                                                                                         |
| <b>VECTOR</b>           | pDONR223                                                                                         |
| <b>NCBI SYMBOL</b>      | A1CF                                                                                             |
| <b>LENGTH</b>           | ProteoGenix bp                                                                                   |
| <b>SEQUENCE PRIMERS</b> | Forward primer M13R (5'→3'): GTAAACGACGGCCAGT<br>Reverse primer T7P (5'→3'): TAATACGACTCACTATAGG |

### ORF (Only for reference, product provided without STOP codon )
